

Franke Textura Semi Pro Tap

Replacing Cartridges & O Rings

Replacing the cartridge

Before replacing the cartridge you will need to turn the water off. You will first need to remove the handle retaining screw (1) by using a 2.5mm allen key and then remove the handle (2). You will then be able to undo the brass screw (3) with a crosshead screwdriver and remove the white plastic sleeve (4) on the valve. You can then remove the existing cartridge (5) by using an adjustable spanner and fit the new parts.

Replacing the o rings

To replace the o rings you will need to remove the spout retaining screw (6) by using a 2.5mm allen key. You can then remove the spout (7) and replace the o rings (8) at the base with the new parts.
